

## 'Class by Class'

In the month of December, the students from the XV. Gimnazija had a chance to meet Mr Zoran Jagec, the president of the 'Class by Class' association. This association helps hundreds of children living in poor and undeveloped countries receive their education in modern and well-equipped classrooms.

The students had an honour to be a part of an exciting and amazing lecture about the incredible doings that this organisation carries out every year. All of the most recent projects of the organization were presented to students in fun and interactive ways. During the lecture, students had a chance to connect the presented topic with the global context **Fairness and development**, as they got to discuss the relationships and struggles within communities. They got to see the breath-taking culture and get familiar with the ways of living small communities. The students also had a chance to help fund this incredible association.
