

Service Learning Project

Project Name: Collaborative Collage

The goal of my project is:

To encourage the IBMYP students to collaborate and learn how to comfort one to another while also highlighting their uniqueness.

What supplies will I need?

Pencil, paper, scissors, glue and cardboard

What I want to learn from this project is:

How different styles of drawing can connect to create a new drawing and change all perspectives to create a whole different and new one. The point is to discover something that can only be done by connecting the unexpected and experimenting.

How does this project connect with all of your subjects (Math, Science, Social Studies, Language Arts)?

This connects to Art and Social Studies as it includes communication of perceptions and drawing. The 2nd graders had a task to work in pairs and draw the same thing they saw in front of them with a pencil. Later on, they would cut their papers in pieces that create one piece of drawing of what they were looking at as a pair.

Example of a shot they were observing:

The results:
