

SERVICE LEARNING PROJECT

Name : Leda J.

Project name: Welcoming letter to freshman

The goal of my project is:

To welcome freshmen who are enrolling into XV.GIMNAZIJA IB MYP with a letter offering advice, encouragement, and guidance as they start high school.

What supplies will I need?

- Paper and pen for writing the letter
- Time for research on what helpful and useful tips can be offered to freshmen
- Feedback from my English B teacher to improve the content and overall letter

What I want to learn from this project is:

- What is the best way to present and give recommendations to younger students
- What words one should use in order to be positive and supportive
- How the written words can influence someone's spirit

How does this project connect with all of your subjects (math, sciences, social studies, languages, arts...)?

For English B, this project is related to the topic with a focus on my writing skills. Writing this welcoming letter allows me to apply many important language skills in writing clear, concise, and supportive messages, which is very crucial in English B. Moreover, the fact that English B encourages comprehension about diverse groups by writing to a specific group, in my case, MIOC IB freshmen, I feel connected to different people, adapting to the targeted group. This will also help me in improving my writing style, tone, and empathy, which are all crucial in language learning.
